# Good Puppy, Great Dog!

How to create the  
**right relationship**  
with your Puppy

## Make the most of your puppies socialisation period

Veterinarians and Canine Behaviourists agree that the 6 to 16 week period is the most crucial developmental period in a dog's life.

At The PET Academy, we ensure that during this crucial period the correct behaviours are being shaped on a daily basis. This will give your puppy every opportunity to become a well-adjusted life-long member of your family.

Too often at this stage, many puppies are left at home alone during working hours. This will usually result in the creation of their own undesirable behaviours, due to lack of guidance many of which will need correction at a later date. When you place your puppies in our care, we do not give them the opportunity to form these behaviours such as:

-  **Incorrect toileting habits**
-  **Indiscriminate chewing**
-  **Inappropriate barking**
-  **Jumping on visitors**
-  **Separation anxiety**
-  **Digging ...etc**

Using reward based training and positive reinforcement we redirect and shape your puppies behaviours to make them successful members of your household.

## MISSION STATEMENT

The PET Academy was born as a result of much time spent working and volunteering in areas such as welfare shelters, grooming salons and dog training organisations. We believe the key to a successful relationship between dog and owner is about getting it right from the start. At The PET Academy your puppy spends its day learning how to be a 21<sup>st</sup> Century Companion.

We believe that "Behaviour that is Rewarded is Repeated" and use this technique to teach both you and your pup how to communicate effectively and build a relationship based on trust and understanding.

## OUR GOAL

We are passionately committed to helping you create a well balanced canine companion with whom you will enjoy sharing your life.

Our goal is to live in a world where animals are no longer abandoned and destroyed because of a lack of communication and understanding.

*"The most effective way to achieve right relations with any living thing is to look for the best in it, and then help that best into the fullest expression"*
